ABOUT ME

Who am I

I am in the 4th year of my Graduation currently & I am a coder (software engineer). I am doing my graduation from the Vellore Institute of Technology (VIT). One thing that most teachers say about me is that I am a very fast learner and a very responsible person for any job/work. I am looking for this internship to learn more about the corporate world and to see how these big Multinational Companies work.

Why you should give me internship ?

I am an up-to-the-minute person, who keeps seeking amazing opportunities to learn more and exciting things all the time, I have good experience in all levels of Application testing, including performance, functional, integration, system, and user acceptance with robust problem-solving skills and proven experience in creating and designing software.
